

ATS for E-Citizen

The E-Citizen (Syllabus 1.0) is a global qualification, developed by the ECDL foundation in response to European directives promoting E-Citizenship. It focuses primarily on the candidate's skills and knowledge in essential computer and internet use and gives them the confidence to participate in society as an E-Citizen. It allows the candidate to learn about the internet without requiring prior computer knowledge

E-Citizen aims to give the candidate:

- Awareness of available information from a wide variety of resources. Including news, government, consumer, travel, education/training, employment, health and business.
- Confidence in interacting with service providers.
- The ability to carry out routine tasks, such as buying a CD or a book, paying bills, banking online, completing a tax return or making a holiday reservation.

The Automated Testing Software (ATS) for E-citizen is a unique assessment tool to measure the competency of a candidate based on the E-Citizen manual question and test base (MQTB). Litmus Learning LTD ATS conforms to the ECDL foundations syllabus and standards.

Facts and Features:

- No local installation required (other than support files), which reduces time spent on the initial setup.
- Instant marking and immediate test results are comforting to candidates, and dramatically decreases the amount of time spent on manually marking papers.
- The software both records and stores the candidate's work allowing post examination checking and authentication.
- The software allows tests to be taken in both English and Arabic.

Benefits:

- Lower Costs – Automated Testing Software reduces the man hours spent on administration and marking processes, the software automatically marks and the ATS Administrator manages registrations and results.
- Time Management - Less time spent on administrative tasks and manual marking, and more time spent on training and supporting candidates.
- Improved Motivation - Interactive technologies are more engaging and realistic for candidates, offering confidence and familiar testing environments.

Support:

- Microsoft Windows XP
- Microsoft Office 2003
